E-mail	irchina@adama.com	irchina@adama.com	

#### 2. Main Business or Products during the Reporting Period

##### Main Business and Products

The Company is a global leader in crop protection, engaging in the development, manufacturing and commercialization of a wide range of crop protection products, that are largely off-patent. The Company provides solutions to farmers to combat weeds, insects and disease, and sells its products in dozens of countries globally, with direct presence in all top 20 markets.

The Company's main products are herbicides, insecticides and fungicide, which protect agricultural and other crops against weeds, insects and disease, respectively. The Company also utilizes its expertise to adapt such products also for the development, manufacturing and commercialization of similar products for non-agricultural purposes (Consumer and Professional Solutions). In addition, the Company leverages its core capabilities in the agricultural and chemical fields and operates in several other non-agricultural areas, none of which, individually, is material for the Company. These activities, collectively reported as Intermediates and Ingredients, include

primarily, (a) the manufacturing and marketing of dietary supplements, food colors, texture and flavor enhancers, and food fortification ingredients; (b) fragrance products for the perfume, cosmetics, body care and detergents industries; (c) the manufacturing of industrial products and (d) other non-material activities.

The Company's business model integrates end-customer access, regulatory expertise, state-of-the art global R&D, production and formulation facilities, thereby providing the Company a significant competitive edge and allowing it to launch new and differentiated products that meet local farmers and customer needs in key markets.

The Company's primary operations are global, spanning activities in North America, Latin America, Asia-Pacific (including China) and Europe, Africa and the Middle East.

#### General crop protection market environment

Through 2025, channel inventory returned to pre-pandemic levels in most countries, following crop protection demand recovery. Pricing pressures remain high, driven by production over-capacity of active ingredients (AI). Crop commodity prices remain stably low, while farmer profitability remains tight leading to just-in-time purchasing patterns.

#### Market Competition and the Company's Market Share

The global crop protection market is dominated by seven multinational companies, including the Company, five of which are originator companies. In the past decade, a number of mergers and acquisitions were completed among the largest players in the crop protection industry. Nonetheless, the crop protection industry as a whole is relatively decentralized, with a number of local manufacturers competing in each country against the global multinational companies. The Company believes that entry barriers for the crop protection market are relatively high, although they vary from region to region.

ADAMA is a leading company (in sales terms) among the crop-protection companies that focus on off-patent crop protection solutions. The Company's global crop protection market share was approximately 6% in 2025, based on preliminary estimation made by AgBio Investor regarding total sales in the agrochemical industry, and 5% in 2024.
